Compute Services

1. **Amazon EC2** (Elastic Compute Cloud) - Virtual servers in the cloud.
2. **AWS Lambda** - Serverless compute service.
3. **Amazon ECS** (Elastic Container Service) - Container management service.
4. **Amazon EKS** (Elastic Kubernetes Service) - Managed Kubernetes service.
5. **AWS Fargate** - Serverless compute for containers.
6. **AWS Batch** - Batch computing service.
7. **AWS Elastic Beanstalk** - Platform-as-a-Service (PaaS) for app deployment.
8. **AWS Outposts** - Run AWS infrastructure on-premises.
9. **AWS App Runner** - Fully managed container application service.
10. **AWS Wavelength** - Edge computing for 5G networks.

Storage Services

11. **Amazon S3** (Simple Storage Service) - Object storage.
12. **Amazon EBS** (Elastic Block Store) - Block storage for EC2.
13. **Amazon EFS** (Elastic File System) - Managed file storage.
14. **Amazon S3 Glacier** - Low-cost archival storage.
15. **AWS Storage Gateway** - Hybrid cloud storage.
16. **AWS Backup** - Centralized backup service.
17. **AWS Snow Family** - Physical data transport devices.
18. **Amazon FSx** - Managed file systems (Windows, Lustre, etc.).
19. **AWS Elastic Disaster Recovery** - Disaster recovery service.

Database Services

20. **Amazon RDS** (Relational Database Service) - Managed relational databases.
21. **Amazon DynamoDB** - NoSQL database.
22. **Amazon Redshift** - Data warehousing.
23. **Amazon Aurora** - High-performance relational database.
24. **Amazon Neptune** - Graph database.
25. **Amazon ElastiCache** - In-memory caching.
26. **Amazon DocumentDB** - MongoDB-compatible database.
27. **Amazon Keyspaces** - Managed Apache Cassandra service.
28. **Amazon Timestream** - Time-series database.
29. **Amazon Quantum Ledger Database (QLDB)** - Ledger database.

Networking & Content Delivery

30. **Amazon VPC** (Virtual Private Cloud) - Isolated cloud resources.
31. **Amazon CloudFront** - Content delivery network (CDN).
32. **AWS Global Accelerator** - Improve application availability and performance.
33. **AWS Direct Connect** - Dedicated network connection to AWS.
34. **Amazon Route 53** - Domain Name System (DNS) service.
35. **AWS App Mesh** - Service mesh for microservices.

36. **AWS Cloud Map** - Service discovery for resources.
37. **AWS VPN** - Virtual private network.
38. **AWS PrivateLink** - Secure access to services.
39. **AWS Transit Gateway** - Network transit hub.

Security, Identity, & Compliance

40. **AWS IAM** (Identity and Access Management) - User access management.
41. **AWS Organizations** - Manage multiple AWS accounts.
42. **Amazon Cognito** - User authentication and management.
43. **AWS Secrets Manager** - Manage secrets and credentials.
44. **AWS Key Management Service (KMS)** - Encryption key management.
45. **AWS Certificate Manager** - SSL/TLS certificates.
46. **AWS Shield** - DDoS protection.
47. **AWS WAF** (Web Application Firewall) - Web traffic filtering.
48. **AWS Artifact** - Compliance reports and documents.
49. **AWS Security Hub** - Centralized security management.
50. **AWS Audit Manager** - Audit compliance.
51. **AWS Detective** - Security investigation.
52. **AWS Macie** - Data privacy and protection.
53. **AWS GuardDuty** - Threat detection.

Management & Governance

54. **AWS CloudWatch** - Monitoring and observability.
55. **AWS CloudTrail** - Logging and auditing.
56. **AWS Config** - Resource configuration tracking.
57. **AWS Systems Manager** - Manage resources and applications.
58. **AWS Control Tower** - Multi-account governance.
59. **AWS Trusted Advisor** - Best practice recommendations.
60. **AWS Service Catalog** - Manage approved cloud resources.
61. **AWS Auto Scaling** - Automatically scale resources.
62. **AWS OpsWorks** - Configuration management.
63. **AWS Well-Architected Tool** - Review workloads.
64. **AWS Launch Wizard** - Deploy third-party applications.

Analytics

65. **Amazon Athena** - Query data in S3 using SQL.
66. **Amazon EMR** (Elastic MapReduce) - Big data processing.
67. **Amazon Kinesis** - Real-time data streaming.
68. **Amazon QuickSight** - Business intelligence and dashboards.
69. **AWS Glue** - Data integration and ETL.
70. **Amazon MSK** (Managed Streaming for Kafka) - Managed Apache Kafka.
71. **AWS Data Pipeline** - Data workflow orchestration.
72. **Amazon OpenSearch Service** - Search and analytics.

73. **AWS Lake Formation** - Build data lakes.

Machine Learning & AI

74. **Amazon SageMaker** - Build, train, and deploy ML models.
75. **Amazon Rekognition** - Image and video analysis.
76. **Amazon Polly** - Text-to-speech service.
77. **Amazon Lex** - Build conversational interfaces.
78. **Amazon Comprehend** - Natural language processing (NLP).
79. **Amazon Translate** - Language translation.
80. **Amazon Transcribe** - Speech-to-text service.
81. **Amazon Forecast** - Time-series forecasting.
82. **Amazon Personalize** - Real-time personalization.
83. **Amazon Textract** - Extract text from documents.
84. **AWS DeepRacer** - Autonomous racing car for ML.
85. **AWS DeepComposer** - Generative AI for music.
86. **AWS DeepLens** - AI-enabled camera.
87. **Amazon CodeGuru** - Automated code reviews and profiling.
88. **Amazon Lookout for Metrics** - Anomaly detection.

Internet of Things (IoT)

89. **AWS IoT Core** - Connect IoT devices to the cloud.
90. **AWS IoT Greengrass** - Edge computing for IoT.
91. **AWS IoT Analytics** - Analyze IoT data.
92. **AWS IoT Device Management** - Manage IoT devices.
93. **AWS IoT Events** - Detect and respond to IoT events.
94. **AWS IoT SiteWise** - Industrial IoT data collection.
95. **AWS IoT Things Graph** - Visualize IoT workflows.

Developer Tools

96. **AWS CodeCommit** - Source control service.
97. **AWS CodeBuild** - Build and test code.
98. **AWS CodeDeploy** - Automate code deployments.
99. **AWS CodePipeline** - Continuous integration and delivery.
100. **AWS Cloud9** - Cloud-based IDE.
101. **AWS X-Ray** - Debug and analyze applications.
102. **AWS Amplify** - Build web and mobile apps.
103. **AWS Device Farm** - Test apps on real devices.

Application Integration

104. **Amazon SQS** (Simple Queue Service) - Message queuing.
105. **Amazon SNS** (Simple Notification Service) - Push notifications.
106. **Amazon EventBridge** - Event-driven automation.

107. **AWS Step Functions** - Orchestrate workflows.
108. **Amazon MQ** - Managed message broker.
109. **AWS AppSync** - GraphQL API service.

Customer Engagement

110. **Amazon Connect** - Cloud contact center.
111. **Amazon Pinpoint** - Targeted push notifications.
112. **Amazon Simple Email Service (SES)** - Email sending and receiving.

Business Applications

113. **Amazon WorkDocs** - Secure document storage and sharing.
114. **Amazon WorkMail** - Email and calendaring service.
115. **Amazon Chime** - Video conferencing and communication.
116. **Amazon Honeycode** - Build apps without coding.

End-User Computing

117. **Amazon WorkSpaces** - Virtual desktops.
118. **Amazon AppStream 2.0** - Stream desktop applications.
119. **AWS WorkLink** - Mobile access to internal websites.

Blockchain

120. **Amazon Managed Blockchain** - Create and manage blockchain networks.

Quantum Computing

121. **Amazon Braket** - Quantum computing service.

Game Development

122. **Amazon GameLift** - Host dedicated game servers.
123. **AWS GameKit** - Build game features.

Migration & Transfer

124. **AWS Migration Hub** - Track application migrations.
125. **AWS Application Discovery Service** - Discover on-premises apps.
126. **AWS Database Migration Service (DMS)** - Migrate databases.
127. **AWS Server Migration Service (SMS)** - Migrate servers.
128. **AWS Snow Family** - Physical data transport.
129. **AWS Transfer Family** - File transfers over SFTP, FTPS, and FTP.

AR & VR

130.   **Amazon Sumerian** - Build AR/VR applications.

Satellite

131.   **AWS Ground Station** - Satellite data processing.
